### **DETAILED ACTION**

Receipt of applicants' amendments and remarks submitted August 28, 2006 is acknowledged.

#### ***Claim Rejections 35 U.S.C. 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 34-42 and 45 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly introduced limitation "a pyrimidine compound without antiviral activity" lacks support from the application as originally filed. See, page 20 of the application. "A pyrimidine compound without antiviral activity" is a new concept for the application and constitutes a new matter.

#### ***Response to the Arguments***

Applicants' amendments and remarks submitted August 28, 2006 have been fully considered. The amendments are persuasive to overcome the rejections set forth in the prior office action. The claims as pending are not obvious over prior art as there is no teaching or suggestion to employ leflunomide product and "a pyridine compound without antiviral activity". However, the new concept "a pyridine compound without antiviral activity" introduces new

Art Unit: 1617

matter. Absent of this new limitation, all claims would have been rejected under 35 U.S.C. 103 for the same reasons set forth in the prior office action.

3. As stated in the last office action about the scope of pyrimidine compounds, "it is noted that "During examination, claims are given their broadest reasonable interpretation. See *In re Morris*, 127 F.3d 1048, 1053-54, 44 USPQ2d 1023, 1027 (Fed. Cir. 1997)." Pyrimidine compounds," interpreted broadly, would read on all compounds having pyrimidine moiety, including those well-known antiviral compounds. Further, Administering any of the compounds having pyrimidine moiety would have reasonably been expected to increase the level metabolites of pyrimidine, such as uridine.

4. Subject matters as claimed to claim 34, and limited to those wherein *pyrimidine compound* is uridine, orotic acid and orotidine would be favorably considered. Note, claim 42 read on uridine compounds, i.e. any derivatives of uridine."

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1617

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
